

Didukh Ya.P. The «Red Data Book of Ukraine. Plant Kingdom» // Ukraine botanical journal. -2010.- Vol.67, N4. - P. 481-503.

Results of publication of the third edition of the Red Data Book of Ukraine (2009) are generalized. This edition includes 826 species (611 vascular plants, 46 bryophytes, 60 algae, 52 lichens, and 57 fungi). Approaches to species selection are discussed; a comparative assessment of conservation categories accepted in Ukraine and by IUCN is provided, as well as species distribution according to phytogeographical and political regions. The complete list of vascular plants and their categories is provided
