

M. Shkvyrya Monitoring researches of large carnivore mammals in Ukrainian Polissya. // Sci. Bull. Uzhgorod Univ. (Ser. Biol.) - 2005.- Vol. 17. – P. 100-104.

The article contains results of estimating of predators number on territory and characteristic of sites as constant home ranges for lynxes and wolf's packs, collection of ecological and behaviour data and also studying of synantropization level. We used standard methodics such as winter route census, maps of home ranges and radiotelemetry. There are some recommendations for management of populations of wolf and lynx.
