

### Medicinal Substances (Pharmaceuticals) and Personal Care Products

Priority 1	Fipronil Caffeine Cetirizine Lamotrigine Telmisartan N,N-Diethyl-m-toluamide (DEET) Carbamazepine Triclosan Diazinon
Priority 2 <sup>1</sup>	Clarithromycin Venlafaxine* Cefalexin* Clindamycin* Ofloxacin* Benzophenone-3*, <sup>2</sup>

### Industrial Chemicals

Priority 1	Tris (1,3-dichloroisopropyl) phosphate Triphenyl phosphate (TPPA)
Priority 2	Bisphenol A DEHP (Bis(2-ethylhexyl) phthalate) Perfluoro Octanoic Acid (PFOA) Perfluorooctane sulfonic acid (PFOS) Pentabromodiphenyl ethers Fluorotelomer alcohols*, <sup>3</sup> Decabromodiphenyl ether* Polychlorinated biphenyl (CB)118*

### Polyaromatic Hydrocarbons

Priority 1	Fluoranthene Pyrene
Priority 2	Benzo(a)pyrene

### Authorised Agricultural Pesticides

Priority 1	Dimethenamid (SAN 582H) Bentazone Boscalid (Nicobifen)
Priority 2	Cypermethrin Thiamethoxam* <sup>4</sup> Clothianidin* <sup>5</sup> MCPA and precursors/degradation products*

### Banned Agricultural Pesticides

Priority 1	Rotenone Diuron
Priority 2 <sup>6</sup>	Atrazine Hexachlorobenzene Hexachlorocyclohexane

### Other substances (including those already selected prior to survey)

Priority 1	Nitrogen Phosphorus pH Biochemical oxygen demand Aluminium Nickel Copper Zinc Cadmium Lead Manganese*. <sup>7</sup> Faecal coliforms
Priority 2	Arsenic* Tributyl tin* Silver*

<sup>1</sup> Selected by stakeholder survey (at least 80% of respondents), or was a specific suggestion not on the proposed list (marked \*)

<sup>2</sup> Representative of UV sunscreen filter substances

<sup>3</sup> Precursor compounds to PFOA, frequently detected alongside PFOAs.

<sup>4</sup> Representative of neonicotinoids

<sup>5</sup> Neonicotinoid and degradation product of thiamethoxam

<sup>6</sup> No banned pesticide was voted for by 80% of stakeholders, so the three substances with 60% votes have been selected

<sup>7</sup> Suggested by stakeholder, had been wrongly omitted from the original list
