

Cultural values of UK Seas: Marine Ecosystems Research Programme

List of stakeholders

In 2017, 37 interviews were conducted with people who directly use the marine environment and who represent a wide range of interests in the southwest of England and West Coast of Scotland. They represented the regulatory (e.g. fisheries authorities, environmental non-government organisations, policy-makers, strategic partnerships, scientists); provisioning (e.g. inshore and offshore fisheries); and tourism/leisure/recreation sectors (e.g. tourism, wildlife tourism, fishing charters, diving, angling); as well as local residents.
