

Freshwater algae in Britain and Ireland - Bibliography

Floras, monographs, articles with records and environmental information, together with papers dealing with taxonomic/nomenclatural changes since 2003 (previous update of 'Coded List') as well as those helpful for identification purposes. These are listed only where available online and include unpublished information.

Useful websites are listed at the end of the bibliography. Further links to relevant information (catalogues, websites, photocatalogues) can be found on the site managed by the British Phycological Society (<http://www.brphycsoc.org/links.lasso>).
